## Smart Dupline® Input/Output Module Type BDB-IOCP8x-U

#### **Product Description**

The BDB-IOCP8 is an input/output module to be connected to PNP transistor outputs and contact inputs. It offers a flexible installation concept to integrate a smart-house system with already existing light

switch/push buttons in building automation installations. It is part of the smarthouse concept and can be used with all the functions supported by the smarthouse controller.

· Light switch for building automation

4 contact outputs for LED with voltage up to 8.0 V

4 contact inputs for pushbuttons

Input pulse prolongation
Compact housing
Bus supplied

· Low current consumption

application

### **Type Selection**

| Input | Outputs | Output voltage | Bus supplied |
|-------|---------|----------------|--------------|
| 4     | 4 PNP   | 3.3 V          | BDB-IOCP8-U  |
| 4     | 4 PNP   | 8.0 V          | BDB-IOCP8A-U |

#### **Input Specifications**

| <b>Inputs</b>                           | 4 contacts  |
|---|-------------|
| Input current, each channel             | 0.1 mA      |
| Input pulse prolongation                | min. 272 ms |
| Cable length                            | ≤ 0.2 m     |
| Dielectric voltage<br>Inputs - Dupline® | None        |

### **Output Specifications**

| Outputs            | 4 PNP       |
|--------------------|-------------|
| Load, each channel | Max. 1.5 mA |
| Output voltage     |             |
| IOCP8              | 3.3 V       |
| IOCP8A             | 8.0 V       |
| Cable length       | ≤ 0.2 m     |

#### **Dupline® Specifications**

| Voltage                              | 8.2 V |
|--------------------------------------|-------|
| Maximum Dupline <sup>®</sup> voltage | 10 V  |
| Minimum Dupline <sup>®</sup> voltage | 5.5 V |
| Maximum Dupline <sup>®</sup> current | 10 mA |
|                                      |       |

## **Supply Specifications**

| Power supply | Supplied by Dupline <sup>®</sup><br>bus |
|--------------|---|
|              |   |
|              |   |

### **Mode of Operation**

The BDB-IOCP8x-U is fully programmable via the SH tool: each input and each output can be individually associated to one or more functions supported by the smart-house system.

# BDB-IOCP8x-U connected to the SH2WEB24

#### Coding/Addressing

If the input/output module is connected to the SH2WEB24 controller, no addressing is needed since the module is provided with a specific identification number (SIN): the user has only to insert the SIN number in the SH tool when creating the system configuration. Used channels: 4 input channels, 4 output channels.

## BDB-IOCP8x-U connected to the BH8-CTRLX-230

#### Coding/Addressing

If the input module is connected to the BH8-CTRLX-230 controller, the user has to program the dupline channels using the BGP-COD-BAT: this module has 4 input and 4 output channels.
