

# Smart Dupline® Relay Output Module Type SH2RE1A424

CARLO GAVAZZI

- 4 SPST NO relays
- Relay load 5A with AC resistive load, 3A DC resistive load
- 2 DIN housing
- LED indication for power supply, Dupline® bus, output1, output2, output3, output4
- Connection to other cabinet modules via local bus

## Product Description

This is a four-relay output module for DIN mounting. The outputs are normally OFF. When an activation command is received from the Dupline® bus, the output turns ON and remains ON until the OFF command is

received. Thanks to the internal bus, the SH2RE1A424 modules can be connected one next to the other without the need for wiring the Dupline® bus.

## Ordering Key SH 2 RE 1A 4 24

## Type Selection

Housing	Mounting	Relay max. load	Relay outputs	Supply: 15 to 30 VDC
2 DIN	DIN-rail	5A	4 SPST NO relays	SH2RE1A424

## Output Specifications

Relay output	4 SPST NO relays									
Resistive load	<table border="1"> <thead> <tr> <th></th> <th>AC</th> <th>DC</th> </tr> </thead> <tbody> <tr> <td>5 A, 250VAC</td> <td></td> <td></td> </tr> <tr> <td>3A, 30VDC</td> <td></td> <td></td> </tr> </tbody> </table>		AC	DC	5 A, 250VAC			3A, 30VDC		
	AC	DC								
5 A, 250VAC										
3A, 30VDC										
Mechanical life	5 x 10 <sup>6</sup> operations									
Electrical life	1x10 <sup>5</sup> operations (5A at 250VAC) 2x10 <sup>5</sup> operations (3A at 30VDC)									
Derating	@50°C: max total current 12A @40°C: max total current 14A @30°C: max total current 16A									
Contact ratings	AgNi									
Contact material	1250 VA, 90 W									
Max. switching power	10 mA at 5 VDC									
Failure rate (reference value)										
Connection	O1: relay output1 O2: relay output2 O3: relay output3 O4: relay output4									

## Supply Specifications

Power supply	Overvoltage cat. II (IEC 60664-1, par. 4.3.3.2)
Rated operational voltage	15 to 24 VDC ± 20%
Power-on delay	Typ. 2s
Power Consumption	2W

## Dupline® Specifications

Voltage	8.2 V
Maximum Dupline® voltage	10 V
Minimum Dupline® voltage	5.5 V
Maximum Dupline® current	1.5 mA

The Dupline® bus is present on the internal bus: the modules can be connected one next to the other without the need of wiring the Dupline® bus. See "Wiring diagram".

## Input Specifications

Keypad	For local ON/OFF switching

## General Specifications

<b>Installation category</b>	Cat. II	<b>Connection</b>	
<b>Dielectric strength</b> Dupline® to output and power supply to output	4 kV AC for 1 min. 6 kV impulse 1.2/50µs (IEC60664-1, TAB. A. 1)	Terminal	10 screw-type
<b>Address assignment</b>	Automatic: the controller recognises the module through the SIN (Specific Identification Number) that is fitted in the SH tool.	Cable cross-section area	Max. 1.5 mm <sup>2</sup>
<b>Fail-safe mode</b>	In case of interruption of the smart-house connection, the channel will be forced into a specific optional status as described below.	Tightening torque	0.4 Nm / 0.8 Nm
<b>Environment</b>		<b>Housing</b>	
Degree of protection		Dimensions	2 DIN module
Front	IP 50	Material	Noryl
Screw terminal	IP 20	<b>Weight</b>	150 g
Pollution degree	2 (IEC 60664-1, par. 4.6.2)	<b>CE Marking</b>	Yes
Operating temperature	-20° to +50°C (-4° to 122°F)	<b>EMC</b>	
Storage temperature	-50° to +85°C (-58° to 185°F)	Immunity	
Humidity (non-condensing)	20 to 80% RH	- Electrostatic discharge	EN 61000-6-2
<b>LED's indication</b>		- Radiated radiofrequency	EN 61000-4-2
Power LED	1 green	- Burst immunity	EN 61000-4-3
Dupline® LED	1 yellow	- Surge	EN 61000-4-4
Output LED	4 red	- Conducted radio frequency	EN 61000-4-5
		- Power frequency magnetic fields	EN 61000-4-6
		- Voltage dips, variations, interruptions	EN 61000-4-8
		Emission	EN 61000-4-11
		- Conducted and radiated emissions	EN 61000-6-3
		- Conducted emissions	CISPR 22 (EN55022), cl. B
		- Radiated emissions	CISPR 16-2-1 (EN55016-2-1)
			CISPR 16-2-3 (EN55016-2-3)

## Mode of Operation

### Working mode

If the SH2RE1A424 is connected to the Dupline® bus and the bus is working properly, the relay module is in STANDARD mode and the green LED is ON. The relay enters LOCAL mode if the push button is pressed. In LOCAL mode the relay does not accept any command from the bus and the green LED will be flashing. The relay can go back to STANDARD mode after one of the following events:

- 1) As soon as the Dupline® bus returns
- 2) After a timeout of 1 minute after a button press
- 3) After a power cycle.

### Push button

The push button is used for local switching ON/OFF of the outputs, without needing to connect the bus for test purposes.

#### *Bus connected*

With a short press, the user enters LOCAL mode and the green LED will be flashing: at the same time all outputs will be switched ON, if at least one of them is OFF. If all outputs are ON they will be switched OFF.

#### *Bus not connected or faulty*

If the bus is not connected or faulty, the push button overwrites the fail-state status of the outputs: if at least one output is OFF, all of them will be switched ON. If

all outputs are ON they will be switched OFF. Should all the outputs be configured for the safe-state recycle status, then a short pressure will reset the timer and revert to the original status of the outputs.

### Fail/safe condition

The output status of the relays, when the Dupline® bus is not connected or faulty, is programmed via the SH tool and the user can choose between the following options:

1. Outputs always OFF
2. Outputs always ON
3. The four outputs maintain the status they had before the disconnection

4. The four outputs run in a cycle with programmable on and off periods: the user can set both the off and on period from 1 to 255 minutes.

The factory setting is outputs always OFF.

### Addressing

No addressing is needed since the module is provided with a specific identification number (SIN): the user has only to insert the SIN number in the SH tool when creating the system configuration. Used channels: 4 output channels

## LEDs Indication

**Red LED:** 4 output LEDs.

Output1: ON if output1 active, OFF if output1 OFF.  
Output2: ON if output2 active, OFF if output2 OFF.  
Output3: ON if output3

active, OFF if output3 OFF.

Output4: ON if output4 active, OFF if output4 OFF.

**Green LED:** Power status.  
ON: supply ON

OFF: supply OFF

Flashing: LOCAL MODE active

**Yellow LED:** if the Dupline® bus is working properly, it is

always ON.

It is OFF if the bus voltage is lower than 5.5 V or not connected.
