

RDAB20-24...

Damper actuator, 20 Nm

Damper actuator for control of dampers in ventilation systems.

- Torque 20 Nm
- For dampers up to approximately 4 m²
- Power supply 24 V AC/DC

- On/off or 3-point control signal
- Built-in auxiliary switch RDAB20-24S

RDAB20-24 and RDAB20-24S are damper actuators for control of dampers in ventilation systems.

Simple direct mounting

The damper actuator is easily mounted on the damper spindle with the universal spindle clamp. The actuator is supplied with an anti-rotation strap that prevents it from rotating.

Function

Manual operation is possible with the self-resetting pushbutton (the gearing latch remains disengaged as long as the pushbutton is pressed).

The angle of rotation is adjustable with mechanical end stops.

Flexible signalisation

RDAB20-24S has a built-in adjustable 0...100% auxiliary switch.

High functional reliability

The actuator is overload-proof, requires no limit switches and stops automatically when the end stop is reached.

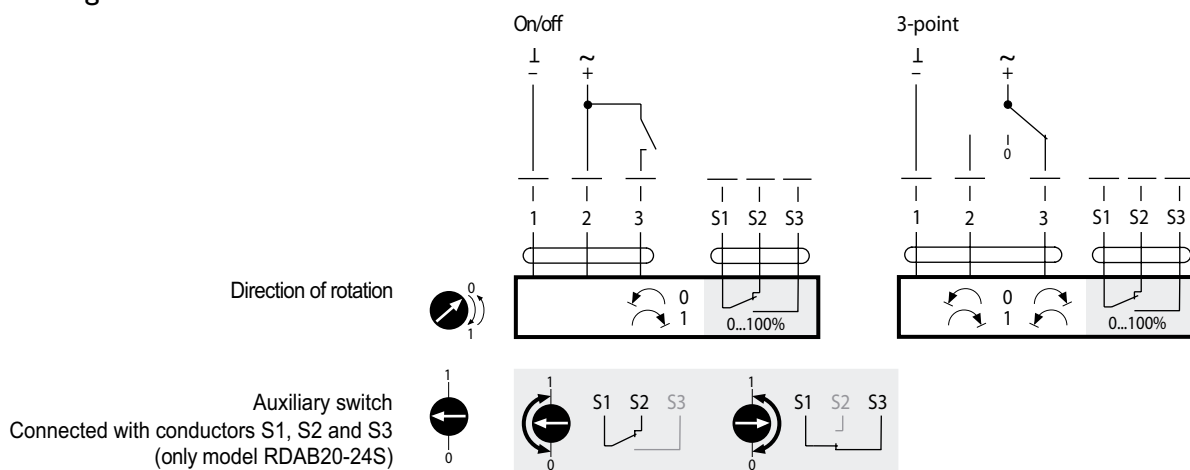

Models

RDAB20-24	Basic model
RDAB20-24S	Model with built-in auxiliary switch

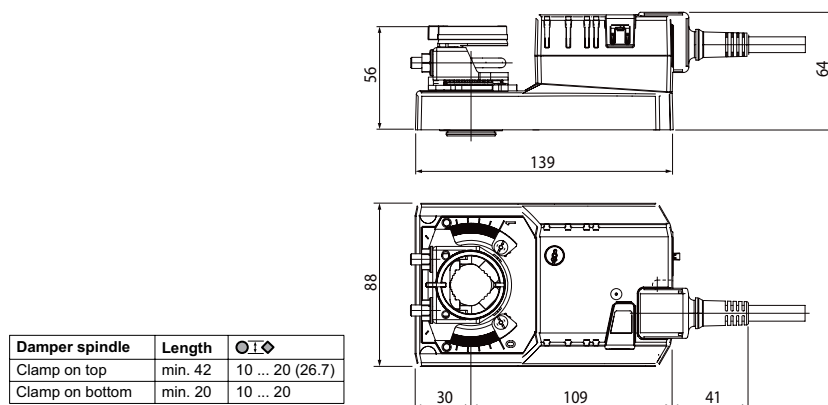

Technical data

Supply voltage	24 V AC 50/60 Hz, 24 V DC
Power consumption	
In operation (at nominal torque)	2 W
At rest	0.2 W
For wire sizing	4 VA
Control signal	On/off or 3-point
Direction of rotation	Selectable with switch
Torque	Min. 20 Nm at nominal voltage
Angle of rotation	Max. 95°, adjustable 0...100% with mechanical end stops
Running time actuator	150 s
Sound power level	Max. 35 dB (A)
Position indication	Mechanical
Protection class	IP54
Ambient temperature	-30...+50°C
Storage temperature	-40...+80°C
Cable	1 m, 3 x 0.75 mm ²
Auxiliary switch (RDAB20-24S)	1 mA ... 3 (0.5) A, 250 V AC
Weight	Appr. 1050 g
CE	The product conforms with the requirements of European EMC standard 89/336/EEC and carries the CE-mark.
